

ACTIVATE AI IN YOUR SAP CONCUR ENVIRONMENT

Turn On Joule with Confidence

Activating Joule for SAP Concur isn't just flipping a switch. It requires SAP BTP provisioning, identity configuration, system validation, and cross-team coordination. With Lyndon Group guiding the process, enabling Joule becomes streamlined, secure, and efficient—so you can unlock AI-driven value without technical roadblocks.

Seamless Technical Activation

From SAP BTP readiness to Joule Base provisioning and booster execution, LG manages the full activation process—ensuring every prerequisite is met and nothing is overlooked.

Expert SAP Concur Guidance

Our team understands how Joule fits within your existing Concur landscape. We coordinate across IT, security, and business stakeholders to keep activation on track and minimize internal lift.

Future-Ready AI Enablement

Proper activation today prepares your organization for tomorrow's AI capabilities. We ensure your environment is secure, validated, and optimized for continued innovation.

What Joule Activation with LG Can Do for You

Our Joule Activation service ensures:

- Proper SAP BTP and Work Zone configuration
- Identity Services (IAS/IPS) setup and validation
- Joule availability confirmation within SAP Concur
- Reduced risk of delays or configuration errors
- Faster time to AI-powered insights
- Documentation and knowledge transfer for your team

Prices Starting at: \$5,900
